Wednesdays, 12:00 PM

- **Location:** Proteomics Building, Rm. 120
  - **Host:** IQB
- **Location:** CABM, Rm. 010
  - **Host:** CABM

- **January 30**
  - **Bill DeGrado**
  - University of California San Francisco
  - *Bespoke Proteins*

- **February 6**
  - **Wonpil Im**
  - Lehigh University
  - *Bacterial Outer Membranes and Interactions with Membrane Proteins*

- **February 13**
  - **Sijian Wang**
  - Rutgers University
  - *Uncertainty Quantification in PDB and Precision Medicine*

- **February 20**
  - **Marcos Pires**
  - Lehigh University
  - *Synthetic Immunotherapeutics Against Bacterial Pathogens*

- **February 27**
  - **Keith Dunker**
  - Indiana University–Purdue University Indianapolis

- **March 27**
  - **Zoltan Szekely**
  - Joseph Bertino
  - Rutgers University
  - *Activated Matriptase - a Novel Antigen for Antibody Directed Toxins to Target Hard-to-treat Cancers. The Science and a Translational Outlook*

- **April 3**
  - **Edward Y. Skolnik**
  - NYU Langone
  - *TBA*

- **April 10**
  - **Arek Kulczyk**
  - Rutgers University
  - *A Vitreous Ice-cold Stare at the Replication Machine*

- **April 17**
  - **Stephen Fesik**
  - Vanderbilt University
  - *Cancer Drug Discovery Using Fragment Based Methods and Structure Based Design*

- **April 24**
  - **David Haas**
  - Tecco Corporation
  - *The Invention of Macromolecular Cryocrystallography*
